**Camira-Rivet** is our standard fabric option (Before decision, please ask availability in stock for quicker delivery). We have many other fabric options (which may apply extra costs). You can click on the name of the fabrics to see.

**Camira-Rivet, Camira-Era, Camira-Synergy,**

Silent ventilation fans make less noise than traditional fans, keeping their silence in **BUSYPOD** products. In this way, you can enjoy the silence while meeting your ventilation needs.

Ethernet lines offer a reliable and flexible network connection. It both offers a more stable connection than wireless networks and allows you to seamlessly connect multiple devices on the same network.

Optional wireless phone chargers have aesthetic designs that are compatible with booths. In this way, chargers can be integrated without to ruin the appearance of the booth. Stylish and minimalist designs enhance the user experience while also contributing to the aesthetics of the space.

Disabled ramps provide seamless access to BUSYPODs in the office for individuals who use wheelchairs or have walking difficulties. Thanks to these ramps, disabled individuals can walk around the office in accordance with their own needs and easily reach the BUSYPODs. This forms an important part of an inclusive work environment.

Optional monitors enable presentations, data sharing and the ability to communicate ideas more effectively in meeting rooms. Attendees better understand the visuals presented on a large, clear screen and increase the impact of presentations. At the same time, more interaction and participation is added to meetings with interactive monitors.

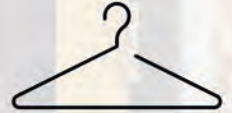

Motion sensors make BUSYPODs in the office more user-friendly. When you enter the booth, the lighting system is activated automatically. In addition, the lights turn off automatically when the booth is empty or inactive for a certain period of time. This contributes to sustainability goals by saving energy.

Manual locks, only available in **BUSYPOD Premium Series**, give users the freedom to feel to secure and protect their privacy. Locks inside securely the booth during phone calls, meetings or gatherings. Individual study prevents outside intervention. This feature gives users complete control over it.

Fire sensors offer the opportunity for early fire detection. Fire sensors used in BUSYPOD Booths quickly and precisely detect fire hazards. In this way, quick action is taken in case of fire and possible damages are minimized.

Coat hangers allow you to hang your clothes neatly before meetings or important interviews. This helps you create a professional and organized look.

Optional wheels eliminate the need to use BUSYPOD Booths in a fixed location. You can move Booths to different areas as needed. Thus, you can create more flexible workspaces by quickly changing the layout in your workplace.
